

Remote Support

Remote Service Support for Converter Systems

Welcome to krecotec Remote Service Support – your direct line to expert help when you need it most.

We provide fast, efficient, and hassle-free remote support for converter and inverter systems, including Woodward™ and other major manufacturers.

Our service is built around flexibility: no long-term commitments, just high-quality technical support exactly when you need it.

With years of hands-on field experience, our engineers are ready to guide your team through fault diagnostics and resolution—quickly and effectively.

Pay only for what you need. Get support that works.

Your benefits

- **Remote support for converter systems – including Woodward™ and others**
- **Fast response times to minimize downtime**
- **No long-term contracts – flexible, pay-as-you-need**
- **Direct access to expert engineers with extensive field experience**
- **Simple, cost-effective support tailored to your situation**
- **Global remote service – quick and easy accessibility**

krecotec – Expertise That Drives Wind Power Forward

Founded in 2022, krecotec gives customers direct access to over 25 years of hands-on experience in wind turbine and converter technology. Our team of engineers has been active in the wind industry since 1991, bringing deep knowledge in engineering, power electronics, and service support.

We deliver more than just products—we provide tailored solutions, engineering services, remote support, technical training, and spare parts to keep your systems running reliably and efficiently.

krecotec – Your partner for expert-driven wind energy solutions.
